

Required files for the successful translation of Hydra-Cad

VERSION 40

- 1.) **Diskette.BS2** – also known as the “Archive file”
- 2.) **Spool.sld** – also known as the “spool file”. This is the file that would normally be printed and faxed, for entry into the computer. This file is extremely useful for Verifying the pipe used, Hanger assembly and components, Identifying the Loose material and can generally help answer several of the questions that may arise when working on a list.

VERSION 50

1. .HLF file
2. .HLPF (text printable file)

The files should be e-mailed to Listing@GemList.com
